

Date: Thursday, 1st of October, 2026

Location scientific talks: Lecture Hall (Von-Siebold-Straße 5)

10-year BIN/DZNE anniversary Symposium

Speakers, talk titles and currently assigned time slots

Speaker	Talk Title	Assigned Time slot
Petri Kursula (Bergen, Norway)	<i>Structural studies on neuronal and myelin proteins using nanobody-based tools</i>	10:20 – 10:45
Isabelle Landrieu (Lille, France)	<i>Use of tau-specific single domain antibodies to inhibit tau aggregation nucleation and seeding in neurodegenerative diseases</i>	11:10 – 11:35
Shirley Knauer (Duisburg-Essen, Germany)	<i>TaNning Taspase1: Nanobodies for Intracellular Detection, Perturbation and Targeted Protein Degradation</i>	11:35 – 12:00
Stefan Glöggler (Texas, USA)	<i>New Frontiers for Molecular Imaging Probes</i>	13:45 – 14:10
Arnaud Gautier (Paris, France)	<i>Chemogenetics to control, image and record cells</i>	14:10 – 14:35
Martin Kerschensteiner (Munic, Germany)	<i>Imaging inflammatory CNS pathology</i>	14:35 – 15:00
Markus Zweckstetter (Göttingen, Germany)	<i>From Tau Structure and Dynamics to Therapeutic Intervention</i>	15:30 – 15:55
Francesca Odoardi (Göttingen, Germany)	<i>Intravital imaging of autoimmune processes at the borders of the central nervous system</i>	15:55 – 16:20
Christian Vogl (Innsbruck, Austria)	<i>Identification of Paralemmin-3 as a putative new deafness gene essential for membrane scaffolding in electromotile outer hair cells</i>	16:20 – 16:45

CENTER FOR BIOSTRUCTURAL IMAGING OF NEURODEGENERATION GÖTTINGEN
