

SCIENCE IN A PINT

WHAT DO BEER, LIGHT AND AI HAVE IN COMMON?
They all change how we perceive the human body.

PhD students present how we can use Light and AI to visualize tissues and cells for better diagnosis of vision impairments, cardiovascular diseases and other ailments.

Only English knowledge and curiosity are needed. Questions are more than welcome in this interactive format!

Date: 29.04.2026

Time: 8:15 PM

Venue: Duke Irish Pub

**Mühlenstraße 4
37073 Göttingen**
